PROFESSIONAL BASEBALL INSTRUCTION
in conjunction with the
BASEBALL HEALTH NETWORK
present the 2022/2023
PITCHING HEALTHY PROGRAM

Pitching Healthy is Presented by PBI and the Baseball Health Network

Why the Pitching Healthy Program?

The professional staff and the PBI consulting team has designed the best pitching program available for today's athletes. The demands for increased velocity have their place in the development of a pitcher, but velocity alone is not going to win a baseball game. **DO NOT CHASE VELOCITY:** Instead, **LET VELOCITY CHASE YOU.** PBI consultant, Keith Cedro, former major league strength coach for the NY Mets understands the unique needs of the throwing athlete. Our strength program, designed by Keith, focuses on overall core strength, stability and physical conditioning. PBI has expanded it's strength training equipment. We have added squat racks, cable cross over ICARIAN machine and SMITH machine. We also use kettle bells, battle ropes, medicine balls, foam rollers, dumbbells, sleds, and a detailed band program for maximum, responsible, throwing arm strength. The primary goals of the Pitching Healthy Program focuses on full body function as it relates to strength and flexibility.

PROGRAM DETAILS

OVERVIEW... All pitchers will work at their personal developmental pace. There is absolutely no way to structure the program across the board for everyone on a schedule. This customized approach will guarantee superior results for all our pitchers. PBI will be using the **RAPSODO** Pitching Analysis System. For complete details on RAPSODO Pitching go to RAPSODO.com. PBI will also use the **"PRO MIRROR"** video system and the **PITCH LOGIC** Training System. For details on PITCH LOGIC System go to PITCHLOGIC.com. Our goal is to allow each pitcher to find their own natural rhythm to maximize their efficiency on the mound.

EVALUATION... Each Pitching Healthy athlete will have a physical assessment done at the beginning of the program. These tests will help determine any injury risks, dysfunctions, imbalances and provide a baseline for their current physical condition. Each baseline test will give PBI the data to develop a personal training plan for each athlete.

PROGRAM STRUCTURE... Each session will begin with a warm-up and movement prep. Followed by pitching specific training including mechanical, mental and conditioning drill work. We will conclude every session with a cool down.

The YPHP will meet on Wednesday's and Saturday's from December thru mid March.

SCHEDULE

2 sessions per week

(Program is December thru March)

LISTEN TO THE PBI STAFF AND CONSULTING TEAM

According to PBI consultant and legendary pitching coach Leo Mazzone, the formula to being a successful, winning pitcher is:

Command the fastball. Own a 2nd pitch you have confidence in. Change speeds effectively off of the fastball. Develop a put 'em away pitch.

PBI coach Steve Hayward, NY Yankees team doctor and PBI consultant Dr. Christopher Ahmad, have created the Baseball Health Network (BHN). The BHN is committed to understanding kinetics and the mechanics associated with the throwing motion and the factors that contribute to arm injury. The BHN understands what is actually harmful to pitchers arm health. All of the BHN data will be translated from the PBI coaching staff to our throwing athletes in the Pitching Healthy Program.

MENTAL APPROACH AND TOUGHNESS

PBI President Doug Cinnella, will be training and cultivating the most important part of the throwing athlete: **HIS BRAIN.**

The mental approach and proper mindset needed to compete at your highest level must be cultivated. These up-to-date, proven methods to high level performance will be a major component of the PHP. Understanding why pitching is an easy task will be taught, learned and used by all PHP athletes.
